

Package ‘daoh’

June 13, 2026

Type Package

Title Days Alive and Out of Hospital (DAOH) Calculation

Version 0.1.0

Description Calculates Days Alive and Out of Hospital (DAOH) from administrative admission/discharge/mortality data using three algorithms (nights, days, exact) and three death-handling approaches (midday, midnight, zero).
Includes tools for comparing methods (Bland-Altman, ICC, reclassification), and plotting.
